

## Thunder Bay International Airports Authority Inc (TBIAAI) Policy Statement on Emissions Reduction

### Purpose

At Thunder Bay International Airports Authority Inc (TBIAAI), we are committed to reducing greenhouse gas emissions and improving energy efficiency as part of our responsibility to environmental stewardship and sustainable operations.

### Commitment

TBIAAI recognizes the importance of minimizing our carbon footprint and contributing to global efforts to combat climate change. We are dedicated to implementing strategies and initiatives that reduce emissions associated with our operations.

### Objectives

Our objectives include:

1. **Emissions Reduction:** Implementing measures to reduce greenhouse gas emissions from airport activities, including ground transportation, energy consumption, and other operational sources.
2. **Energy Efficiency:** Improving energy efficiency across our facilities and operations to minimize energy consumption and associated emissions.
3. **Sustainable Practices:** Promoting sustainable practices and technologies that support emissions reduction and environmental protection.

### Policy Statement

We, the Thunder Bay International Airports Authority Inc, commit to:

1. Setting and achieving measurable targets for reducing greenhouse gas emissions and improving energy efficiency within our operations.
2. Implementing best practices and technologies to minimize our environmental impact and optimize resource use.
3. Encouraging stakeholder engagement and collaboration to advance sustainability initiatives.
4. Regularly monitoring on our progress towards emissions reduction and energy efficiency goals.

### Implementation

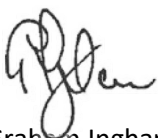

This policy will be implemented through:

- Integration into existing environmental management systems.
- Regular reviews to ensure alignment with emerging best practices and regulatory requirements.

### Public Availability

This policy statement is publicly available on the Thunder Bay International Airports Authority Inc website. We invite feedback and engagement from stakeholders to enhance our sustainability efforts.

This policy is effective as of May 15, 2024 and will be periodically reviewed and updated to reflect our ongoing commitment to emissions reduction and energy efficiency.
